POOL SIDE VIEW AT COMPLETION

This swimming pool was a remodeling project in the suburban foothills area of Sacramento California called Granite Bay, CA. The project consisted of 2-Flowing Streams that descended into a 825 SF pool which cascaded down a 30" vertical drop. The Flowing Streams were equipped with strategically placed colored Fiber Optic Lighting via a lighting delivery capacity of 4-ea 100 strand fiber lenses per stream. The pool was additionally lit with 4-ea color LED large niche lights and 1-ea in the Raised Spa. The pool also had 2-ea Waterfalls and a 80 SF Pebble Finished Caribbean Shelf.

Other features included a +18" 50 SF Raised Spa w/ 10-ea Waterway Power Jets, Firepit / Water Feature Basin combination, tri-level patio areas and a Built-in BBQ Cook Center w/ pass thru window & counter.

The project required a complete replacement of the existing equipment and automation upgraded involved Pentair's i-9 Intellitouch with an i-5 Extension in order to facilitate 5-ea independent "hot-leg switched" Low Voltage Landscape Lighting System. Patio L.V. Lighting involved poured in-place Tahoe style lighting and accent tree up-lighting layout in function zones per each controlling transformer.

The automation capabilities of this project included the i-10 Spa Side Controls and the Hand Held Wireless Controller.
